

CPR Class Locations

The following list represents some of the CPR training centers for the state of Arizona. There may be additional training sites in your area. To satisfy the requirements for any of the Health Care Programs at Phoenix College you must take **CPR for the Healthcare Provider** or **CPR for the Professional Rescuer**. This course will teach you adult, child and infant CPR, one and two-rescuer CPR, FBAO (foreign body airway obstruction), and barrier devices. There is a mandatory skills evaluation as well as a written exam. Lower levels of CPR certification (such as “First Aid”, “Adult & Child”, etc.) will not satisfy program requirements and will not be accepted. Although we attempt to keep this information up-to-date, please check with the individual organizations for the most current information.
