The new LEED professional credentialing system encourages green building professionals to maintain and advance their knowledge and expertise and is now a 2-step process. LEED Green Associate gives you the knowledge to implement the many different ways of using less energy, water, and natural resources; creating less waste; and fostering a healthy and comfortable environment for the occupants.

The LEED AP credential will continue to signify an advanced depth of knowledge in green building practices; it also will reflect the ability to specialize in a particular LEED Rating System. Candidates must demonstrate prior experience working on a LEED registered project to be eligible for this credential.

Cost: $345
Course fee includes curriculum materials and handouts.

CleanEdison and the Building Performance Institute (BPI) offers nationally recognized training, certification, accreditation and quality assurance programs in home performance contracting. Certified BPI professionals understand that the relationship between all interconnected systems of the house is the key to its overall performance, efficiency, and durability. They are trained to quickly target, diagnose, and solve household performance problems.

Who should take this course?
- HERS raters
- Home inspectors
- HVAC professionals
- Insulation professionals
- General contractors
- Homebuilders
- Engineers with a 4-year degree
- Other construction professionals

CleanEdison’s 3-day intensive Building Analyst Certification Training course is a fast-track to BPI certification and is designed for professionals with some previous experience in residential contracting or home inspection.

Cost: $1595
Course fee includes classroom training (1 full day + 2 half-days), field training (2 half-days), course materials, study materials, BPI application fees, written exam fee and field exam fee. The written and field exams will be held on Day 4 and 5 of the course.
OUR PARTNER: We realize that studying and applying to become a LEED AP or certified BPI Building Analyst is an expensive and time consuming process. CleanEdison has developed comprehensive course materials and study aids that focus on all of the right areas, so you can pass the exams on your first attempt.

Our training provides:
• A review of all the topics and information you will need to know to pass the exam
• Proven, time-saving techniques for increasing your exam score
• Detailed study plans that provide the greatest understanding of the exam in the least amount of time
• Online practice exams give you the confidence you need to pass on your first attempt

All of our instructors are LEED APs and hold an advanced degree in a building-related field, with extensive experience in LEED project management. In addition, our qualified and certified BPI instructors have years of experience in the home energy auditing field.

CleanEdison offers LEED Exam Prep courses and Energy Audit Training courses in over 35 cities around the United States.
